# Which cup should I choose?

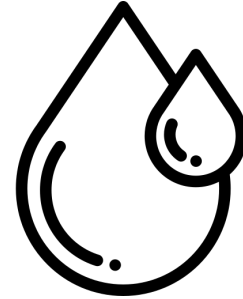

A simple guide to PE, PLA and Aqueous coated products

**PE**

**PLA**

**Aqueous**

## PE COATED

Reliable. Cost effective.

PE (polyethylene) coated cups are the most commonly used option in the gelato and ice cream industry.

They offer excellent moisture resistance and durability, making them ideal for busy service environments and longer holding times.

**Best suited for:** High-volume stores, everyday service, cost-conscious brands

## PLA COATED

Plant-based. Premium eco option.

PLA (polylactic acid) coated cups use a lining derived from renewable plant materials.

They are compostable in commercial composting facilities and are often chosen by brands wanting to showcase sustainability while maintaining performance.

**Best suited for:** Eco-focused brands, premium positioning, sustainability messaging

## AQUEOUS COATED

Plastic-free. Modern. Home compostable.

Aqueous coated cups use a water-based barrier instead of plastic. They provide reliable performance, a clean modern finish and are home compostable offering an environmentally friendly option without the higher cost of PLA.

**Best suited for:** Customers seeking a plastic-free solution, everyday service, value-conscious eco options

Minimum order quantity for Custom Printed Cups is **25,000** per size

# Gelato & Ice Cream Cups

Service cups for everyday use

## Most popular sizes

2oz | 3oz | 5oz

These sizes are the most commonly used across gelato, and ice cream service, offering the right balance of portion control, practicality and brand visibility for day-to-day operation.

Available in PE, PLA and Aqueous coated options.

# Take-Home Containers

Retail freezer containers designed to extend your brand beyond the counter

## Available sizes

500ml - 750ml - 1000ml

Our take-home containers are designed for retail freezer use, allowing customers to enjoy your gelato, ice cream or frozen yoghurt at home while keeping your branding front and centre.

## Designed for Retail & Takeaway

- Foil lined for frozen product performance
- Strong durable construction
- Secure lid fit for transport and storage
- Suitable for gelato, ice cream & frozen yoghurt
- One lid fits all container sizes, simplifying stock management

## Custom Printing Options

- Containers and lids can be customised
- Lid only custom printing available
- White containers can be paired with custom printed lids

A popular and cost-effective option is to use custom printed lids with standard white containers, providing strong brand visibility while keeping costs down.

## Stock Availability

We keep standard white take-home containers in stock, allowing customers to purchase containers as required while using custom printed lids for branding. This provides flexibility in ordering and storage, with custom printed lids available from a minimum order of 10,000 units.

## A Practical Branding Opportunity

Takehome containers offer excellent brand exposure beyond the store. Every time a customer opens their freezer, your branding is visible - reinforcing recognition and repeat purchase

# Coffee Cups

Custom Printed cups for hot beverage service

## Available Sizes

Single Wall

4oz | 6oz | 8oz | 12oz | 16oz | 20oz | 22oz

Double Wall

8oz | 12oz | 16oz | 20oz

Our coffee cups are designed for cafes, gelaterias and hospitality venues looking for consistent branding across hot beverage service. Suitable for takeaway coffee, tea and hot beverages

## Cup Construction Options

Our coffee cups are designed for cafes, gelaterias and hospitality venues looking for consistent branding across hot beverage service. Suitable for takeaway coffee, tea and hot beverages

Single Wall

Lightweight and practical for everyday service, single wall cups offer reliable performance for hot beverages with clean print quality and a modern finish.

Double Wall

Designed for improved insulation and customer comfort, double wall cups reduce heat transfer while maintaining a premium feel in hand.

Aqueous Coated Cups

All coffee cups are available in aqueous coated options, providing a plastic-free barrier with a clean and modern finish. Aqueous coating offers an environmentally friendly solution suitable for hot beverage service without comprising performance.

## Custom Printing

- Custom printing available across all sizes.
- Single wall and double wall options.
- Clean, high quality print finish
- Designed to align with your brand identity.

# The Fine Print

Clear, simple information to help your project run smoothly.

## Artwork & Design

Customers supplying their own artwork must provide final artwork in EPS or vector format, ready for production.

An artwork design service is available, with design work able to commence from \$100.00.

Final artwork design costs will be quoted at the time, depending on complexity and requirements.

For custom printed orders under 50,000 units, a one-off plate set-up fee applies as follows:

- 1 colour: \$150.00
- 2 colours: \$250.00
- 3 colours: \$350.00
- 4 colours: \$450.00

For orders of 50,000 units and above, plate set-up fees are waived.

All artwork must be approved prior to production.

## Order & Payment Terms

- A custom contract will be prepared for all custom printed orders
- 50% deposit is required on signing of contract and approval of artwork
- Balance payable when goods arrive into our warehouse

## Production & Lead Time

Delivery is typically 8–10 weeks from receipt of deposit, depending on product type and production schedule.

Lead times will be confirmed at the time of order.

## Storage & Delivery

We offer storage solutions if required.

- Products can be stored for a period of up to two (2) years
- Storage locations: Sunshine Coast and Gold Coast warehouses
- Delivery can be arranged on our normal delivery schedule as required

This allows flexibility in ordering and stock management.
